

## **José de la Cruz**

Ever since being invited to collaborate as a Board Member for the Internet Society's Puerto Rico Chapter, José has been involved in developing activities which further ISOC's goals.

With the help of other Board Members, José successfully developed an ARIN on the Road event in San Juan which was held on August 2017. José was appointed Logistics Director for the North American School of Internet Governance by ISOC Puerto Rico's Board.

Trained as a Computer Engineer, José teaches computer programming, computer networks, and information security courses at the Polytechnic University of Puerto Rico, Hato Rey Campus, and at the Interamerican University of Puerto Rico, Bayamón Campus. He has also worked as a researcher in Information Security and Digital Forensics projects for the Department of Defense.

José is a founding member of ISOC's Cybersecurity SIG, and active member of the Puerto Rico chapter of Infragard. He is a member of the Association for Computer Machinery and the Puerto Rico Cybersecurity & Cloud Computing User Group.

José holds a Bachelor of Science in General Science from Universidad de Puerto Rico, Rio Piedras Campus, a Bachelor of Engineering in Computer Engineering from Polytechnic University of Puerto Rico, and a Master of Engineering in Computer and Software Engineering from Polytechnic University of Puerto Rico. He was selected for a National Security Agency grant to complete

a Graduate Certificate in Digital Forensics at the Polytechnic University of Puerto Rico.
